Range of EarthSaver® and RubberFlex® Products and Services

The EarthSaver/RubberFlex flooring product line offers a comprehensive range of environmentally preferred flooring, including rubber tile products, rubber rolls and interlocking tile floors. RubberFlex Impact Recycled Rubber Flooring is designed for commercial and sport applications; EarthSaver products include our Elite Series and Classic Series.

Our RubberFlex flooring line was first produced by the German company that invented the process of recycling rubber tires into sheet flooring and underlayment. Today, we call it RubberFlex Impact.

The RubberFlex Impact and EarthSaver series use up to 100 percent post-consumer rubber that would normally end up in junk yards and landfills. The discarded tires are ground into various size granules, then cleaned and sorted after all metal, dirt and fibers are removed. Our EPDM color granules are made from 30 to 100 percent pre-consumer waste. The granules are mixed into a myriad of color combinations preferred color range is only a fraction of the colors and patterns we can produce.

Our team of sales and customer care staff look forward to answering your flooring questions. If you need samples, a consultation, LEED information, specifications, pricing or catalog literature, contact us, or e-mail at info@earthsaverfloors.com. You can also contact us at our website earthsaverfloors.com.

Green Info

We take green solutions seriously. All EarthSaver/RubberFlex flooring products qualify buildings for LEED points while providing a beautiful range of contemporary floor covering. We're proud of the fact that our manufacturing facility has earned Floor Score Indoor Air Quality Certification.

Features and Benefits

EarthSavers/RubberFlex® Flooring is the Perfect Green Solution.

Applications for ES/RubberFlex® flooring.

EarthSaver/RubberFlex product lines are the right choice for facilities requiring floor coverings made from recycled materials and with the durability to stand up to multi-functional uses. Here are a few of the many application possibilities.

RECREATION

- Fitness Areas
- Ice Arenas
- Stadiums
- Indoor Running Tracks
- Outdoor Play Areas
- Gyms
- Mult-Purpose Rooms
- Golf Course Venues

EDUCATION

- Class Rooms
- Hallways
- Cafeterias
- Libraries
- Entrances

HEALTHCARE and SENIOR FACILITIES

- Entry Foyers
- Hallways
- Fitness Areas
- Active-Aging Areas
- Vending Areas

CORPORATE and INDUSTRIAL

- Entry Foyers
- Hallways
- Fitness Areas
- Vending Areas

HOSPITALITY

- Resorts
- Entry Foyers
- Hallways
- Fitness Areas
- Vending Areas
- Restaurants

RETAIL

- Anit-Fatigue Areas
- Retail Kiosks
- Sales Floors
- Pharmacies

Our products are created from up to 100% post-consumer tire rubber and post-industrial EPDM rubber. Our products exceed the strictest environmental standards. We can qualify your facility for LEED credits.

Features and Benefits for EarthSaver® and RubberFlex® Tiles

- Recycled materials
- Contribute to LEED
- Easily installed
- Shock absorbent
- Slip resistant
- Provides traction
- Indoor/outdoor usage
- Resilient
- Durable
- Customizable colors/patterns
- Reduces floor maintenance
- Stain resistant
- U.V. stable
- Variety of products for any budget
- Range of thicknesses

FACTORY SEALING

The EarthSaver/RubberFlex flooring products are available with a factory-applied sealer. We recommend that an additional coat of sealer is applied after the flooring has been cleaned following initial installation. The factory sealing dramatically reduces dirt, dust and residue that can result from installation, making clean-up easier and lowering maintenance costs.

THICKNESS

All EarthSaver/RubberFlex flooring products are available in 3/16" (4mm), 1/4" (6mm) or 3/8" (9mm) thicknesses. Custom thickness is available.

EARTHSAVER[®] Series

RECYCLED RUBBER FLOORING

Our EarthSaver products utilize 100% recyclable rubber tiles and post-industrial EPDM color chips. We offer two product ranges for EarthSaver as well as solid color choices and the custom create-a-color option.

Our "Elite" series has a sand-like appearance where our "Classic" series incorporates larger color chips. Both products are bold color patterns.

CLASSIC SERIES

EARTHSAYER[®] Series

RECYCLED RUBBER FLOORING

EarthSaver is an environmentally responsible choice for architects/ designers and end users in creating sustainable buildings.

SOLIDS

The Elite and Classic series are only a fraction of the color options available. Our "Create-A-Floor" program allows you to mix our 24 color chips into an endless combination of colors.

EARTHSAVER CUSTOM COLORS FOR CREATE-A-COLOR

3 EASY STEPS

Choose from 24 colors to create your unique custom flooring.

Unlimited color combinations make this custom flooring ideal for any installation.

Creating a unique color choice is simple.

STEP 1 Color combination created based on desired percentage of each color.

STEP 2 Loose grain dish sample submitted for approval.

STEP 3 A custom tile sample is submitted for production approval.

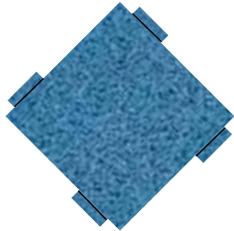

EARTHSAVER® G-FORCE

PLAYGROUND TILE

G-FORCE Playground Tiles create safe play spaces, are 100% recycled, low maintenance and provide easy installation.

G-FORCE Playground Tiles are a shock-absorbing, resilient rubber mat that provide long-term answers to safety, while offering ADA accessibility.

G-FORCE Playground Tiles take the worry and hassles out of play areas. Our solid-construction, 24" x 24" cushioned safety tiles are made from 100% recycled tires. This allows consistent shock absorbency across the entire play surface, even in fall zones higher than six feet. The all-season, low maintenance tiles keep play surfaces puddle-free. And with no need for daily maintenance, you save on upkeep.

Our **NEW G-FORCE INTER-LOCKING** Tiles are available with interlocking attachments in 2 ½" and 3 ½" thicknesses in four colors: red, blue, tan and green.

G-FORCE Playground Tiles exceeds requirements established by the Consumer Product Safety Commission, Americans with Disability Act, and American Standard for Testing Materials. Manufactured entirely within the USA.

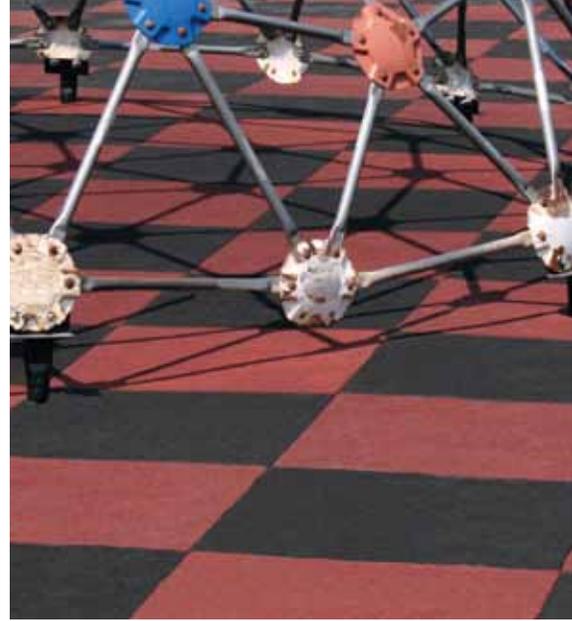

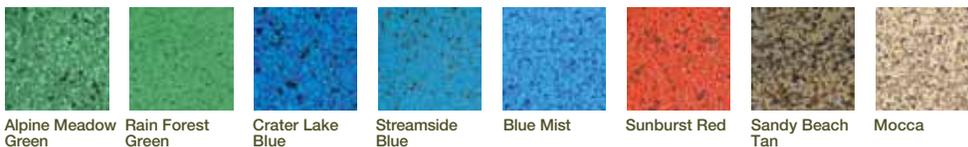

Select your G-FORCE Playground Tiles according to need for safety fall thickness and color. Available in thicknesses of 1 ¾".

CUSTOM COLORS available upon request.

APPLICATIONS

- | | |
|-------------------|---------------------|
| Playgrounds | Pool Areas |
| Decks | Rock Climbing Walls |
| Diving Boards | Safety Areas |
| Exercise Flooring | Skateboard Parks |
| Patios | Sound Reduction |
| Play Areas | Stairways |

EASY TO INSTALL

G-FORCE Playground Tiles provide low cost installation that is easily installed over concrete, asphalt, or roofs.

We offer corners, ramps and transitions.

RUBBERFLEX® IMPACT

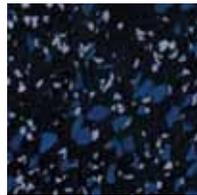

RECYCLED RUBBER FLOORING

Our RubberFlex “Impact” series is the Granddaddy of recycled rubber flooring, in rolls. In conjunction with BSW, the inventor of the technology to recycle tires into sports surfaces, RubberFlex introduced EPDM color granules into their black “Regupol®” Rolls. The result is the most widely used recycled rubber flooring worldwide.

RubberFlex Impact offers three distinct color densities and color patterns. We offer our high-density platinum series in five beautiful color patterns. Our diamond series has seven colors that offer the most widely accented color density. The gold series provides RubberFlex “Impact” an economically priced option with all the benefits and quality of the total “Impact” series.

RUBBERFLEX® KOMFORT

SOLID RUBBER ROLLS

Like all RubberFlex products, Komfort is an environmentally responsible choice. We incorporate up to 100% post-consumer and post-industrial rubber.

Komfort flooring provides optimum shock absorption and resiliency for running, walking, or standing. It reduces the potential for stress and injury yet it's slip resistant.

Komfort is a combination of a cushioned base layer combined with a durable wear layer of highly compressed EPDM rubber. Komfort is available in a standard 5/16" (8mm) thickness but custom thickness and colors are available. You can install RubberFlex Komfort indoors or outdoors, as our system is UV-stable.

RubberFlex Komfort multi-purpose surfacing is the ideal solution for environments such as outdoor/indoor play surfaces, indoor running tracks, and anti-fatigue areas.

Komfort Rolls are available in three standard colors. Rolls are 4 ft. wide by 50 ft. long.

RUBBERFLEX[®] MONSTERTILE

RECYCLED RUBBER FLOORING

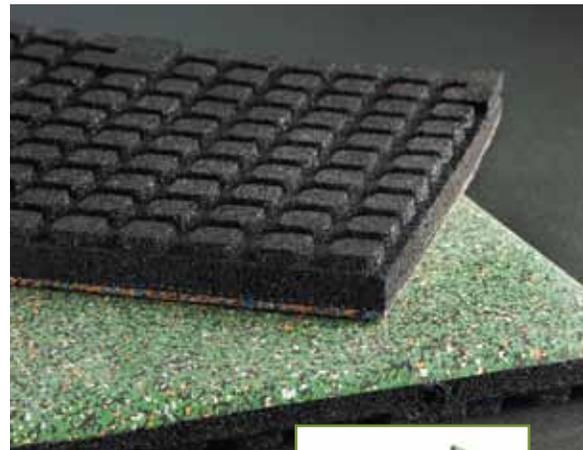

RubberFlex Monster modular tiles deliver superior performance to meet demanding requirements, while the versatile design enhances any décor. Hallmark features include a footed tile system that provides superior drainage and consistent underfoot comfort with tested slip-resistant technology to prevent falls and injuries.

MonsterTile, with its large two-by-two-foot tile size and superior performance features, is the perfect solution for rooftops, patios and pool surrounds in 1" thickness, and indoor spaces, such as weight rooms and heavy abuse areas.

FEATURES

- 24" x 24" tiles x 1"
- Modular
- Sound and shock absorbent
- Easy installation and maintenance
- Slip resistant, wet or dry
- Custom color and logo capabilities
- Meets ADA standards

RubberFlex MonsterTile with its large tile size and superior drainage is the perfect solution for rooftops, patios and pool surrounds.

Available in 15 standard colors.

ARENAFLEX

SOLID COLOR RUBBER TILE

Although ArenaFlex tiles were developed to withstand the torturous abuse of ice skating blades, they have proven a fabulous product for fitness facilities, lobbies, play areas to name a few.

ArenaFlex offers style and function and will perform for years. The ArenaFlex product line is manufactured with a recycled rubber base and a virgin rubber top surface. The two layers are vulcanized to create a homogenous floor tile that is durable, non-porous and easy to maintain.

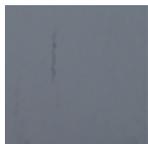

We offer ArenaFlex in two distinct color patterns:

The ArenaFlex "S" has a textured, non-slip finish with a marbled swirl within the solid base color. The 3/8" (9mm) thickness provides sound deadening characteristics and is ideal for ice arenas or where heavy duty flooring is required.

The ArenaFlex "F" has a hammered texture with accent color flecks within the solid base color. It is manufactured using the same vulcanized process as ArenaFlex "S".

ARENAFLEX "S"

Available in 10 colors with a marbled pattern and a smooth suede texture. 39.3" x 39.3" x 3/8" (9mm)

ELASTIFLEX[®]

SPORTS FLOORING

For the tough wear and tear of sports and athletics, ElastiFlex floors outperform conventional wood floors in more ways than one.

Multi-layered construction gives a bounce-back effect that enhances athletes' power, agility, speed and endurance with less overall fatigue. Athletes notice the difference floors absorb shock and impact, reduce leg stress through reduced vibration and provide optimum traction.

With bounce-back durability that withstands heavy loads, a surface that resists scuffs and scrapes, and an antibacterial surface that counteracts odors, ElastiFlex floors virtually maintain themselves. Just mop floor daily for best ongoing performance.

ElastiFlex floors are the versatile, practical, cost-effective choice for:

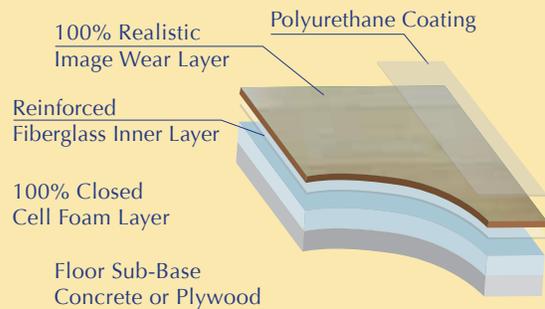

- | | |
|--------------------------|---------------------------------|
| School Gyms | Recreation Centers |
| High School Courts | Sports Facilities |
| College Courts | Boys And Girls Clubs |
| Health Clubs | Community Centers |
| Aerobic and Dance Floors | Physical Rehabilitation Centers |
| Multi-Purpose Rooms | Commercial Applications |

Select your flooring according to surface, color and thickness that best suits your specific needs.

THE POWER OF LAYERS for superior multi-purpose sports floors

ElastiFlex is also available in thicknesses of 5/16" and 3/16" on a special order basis.

AVAILABLE IN TWO WOOD GRAIN AND FIVE SOLID COLORS

CORKFLEX[®]

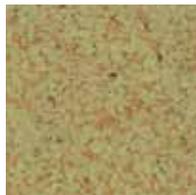

RECYCLED RUBBER/CORK FLOORING

EarthSaver Specialty Flooring is committed to providing the flooring industry with high quality green flooring options. The latest addition to our flooring showcase is our CorkFlex range.

CorkFlex is a combination of recycled rubber granulates and natural cork. Corkflex has 34.9% post industrial content. It is available in 12 beautiful colors and can be produced in an unlimited number of custom colors.

Available in 3.5mm thickness in 4'-0" wide rolls; 36" x 36" or 24" x 24" square edge or 6mm thick interlocking tiles.

GYMVERSAL

SEAMLESS POLYURETHANE FLOOR SYSTEM

Gymversal is truly a multi-functional floor offering excellent shock absorption, sound absorption, and durability. Gymversal has excellent mechanical strength to support heavy equipment and is suitable for a variety of uses including exhibits, child care rooms, cafeterias and multiuse arenas.

Gymversal, installed as an indoor track system, provides the resilience, shock absorption, and traction necessary for safe, comfortable indoor running and walking. With an indoor jogging track, running can be incorporated into warm ups and exercise routines to add versatility and variety to a facility.

Gymversal carries a three (3) year limited warranty against manufacturer's defects.

Ideal for multi-purpose facilities.

The Gymversal Multi-Purpose Sports Floor is an environmentally friendly, multi-layered system comprised of a recycled rubber granulate base covered with four coats of polyurethane. This system allows for a seamless floor installation, making GymVersal an ideal solution for multi-purpose facilities.

GYMVERSAL Profile

1. Matte top coat
2. 1.5mm layer self-leveling polyurethane seamless layer
3. .5mm layer self-leveling polyurethane seamless layer
4. Seal coat
5. 6mm or 7mm polyurethane bound rubber granulated sublayer
6. 2-part adhesive

Gymversal can be installed in a range of thicknesses from the standard ¼" (6mm) to ½" (12mm).

TOP COAT COLORS

Actual colors may vary slightly from color samples. Slight variations may occur due to job site conditions, mixing proportions and installation methods.

EARTHSAVER® QUIETPAD

Sound Reduction Underlayment: The Quiet and Comfortable Solution

QuietPad is an acoustical underlayment that's the preferred choice for high-rises, office buildings, hotels, multi-family homes or simply for the personal comfort of the homeowner. Its state-of-the-art design significantly reduces ambient noise sourced from within the room or from an adjoining or nearby room and exceeds national building code sound reduction requirements.

How does it work? QuietPad is fabricated from a network of thousands of tiny rubber granules. The resulting product effectively interrupts and absorbs sound waves as they travel, contributing to an acoustically healthier indoor environment. As an added bonus QuietPad offers superior underfoot comfort for standing, walking or exercising.

QuietPad is an environmentally preferred product made in the USA from recycled tires and qualifies for LEEDS Green Certifications.

Standard thickness 1/8" (3mm) and 1/4" (6mm) with additional thicknesses up to 1/2" available.

- Designed for acoustic sound insulation
- Installs fast and easy
- Outperforms the competition in head-to-head sound testing
- Incorporates an antimicrobial to inhibit the growth of mold, bacteria and algae
- 20-year limited lifetime warranty
